

The **Dream.Org Entrepreneurs Network** is a coalition of Black and Brown business leaders in the **clean energy and climate tech industry** who work to deploy energy solutions that address key Justice40 Initiative challenges in six communities such as **energy burden, access to clean energy, and workforce development.**

Highlights of our coalition's work during the Community Clean Energy Coalition Prize include:

- Expanding our Entrepreneurs Network **from 7 members to 28 members**, increasing BIPOC leadership in the clean energy and climate tech industry
- Identifying **two community-led climate projects** that are supported through the Dream Entrepreneurs Network.
- Contracting a grant writer to help our **Network drawdown government and philanthropic climate solution dollars**
