

CRAM Micro Grid Generator

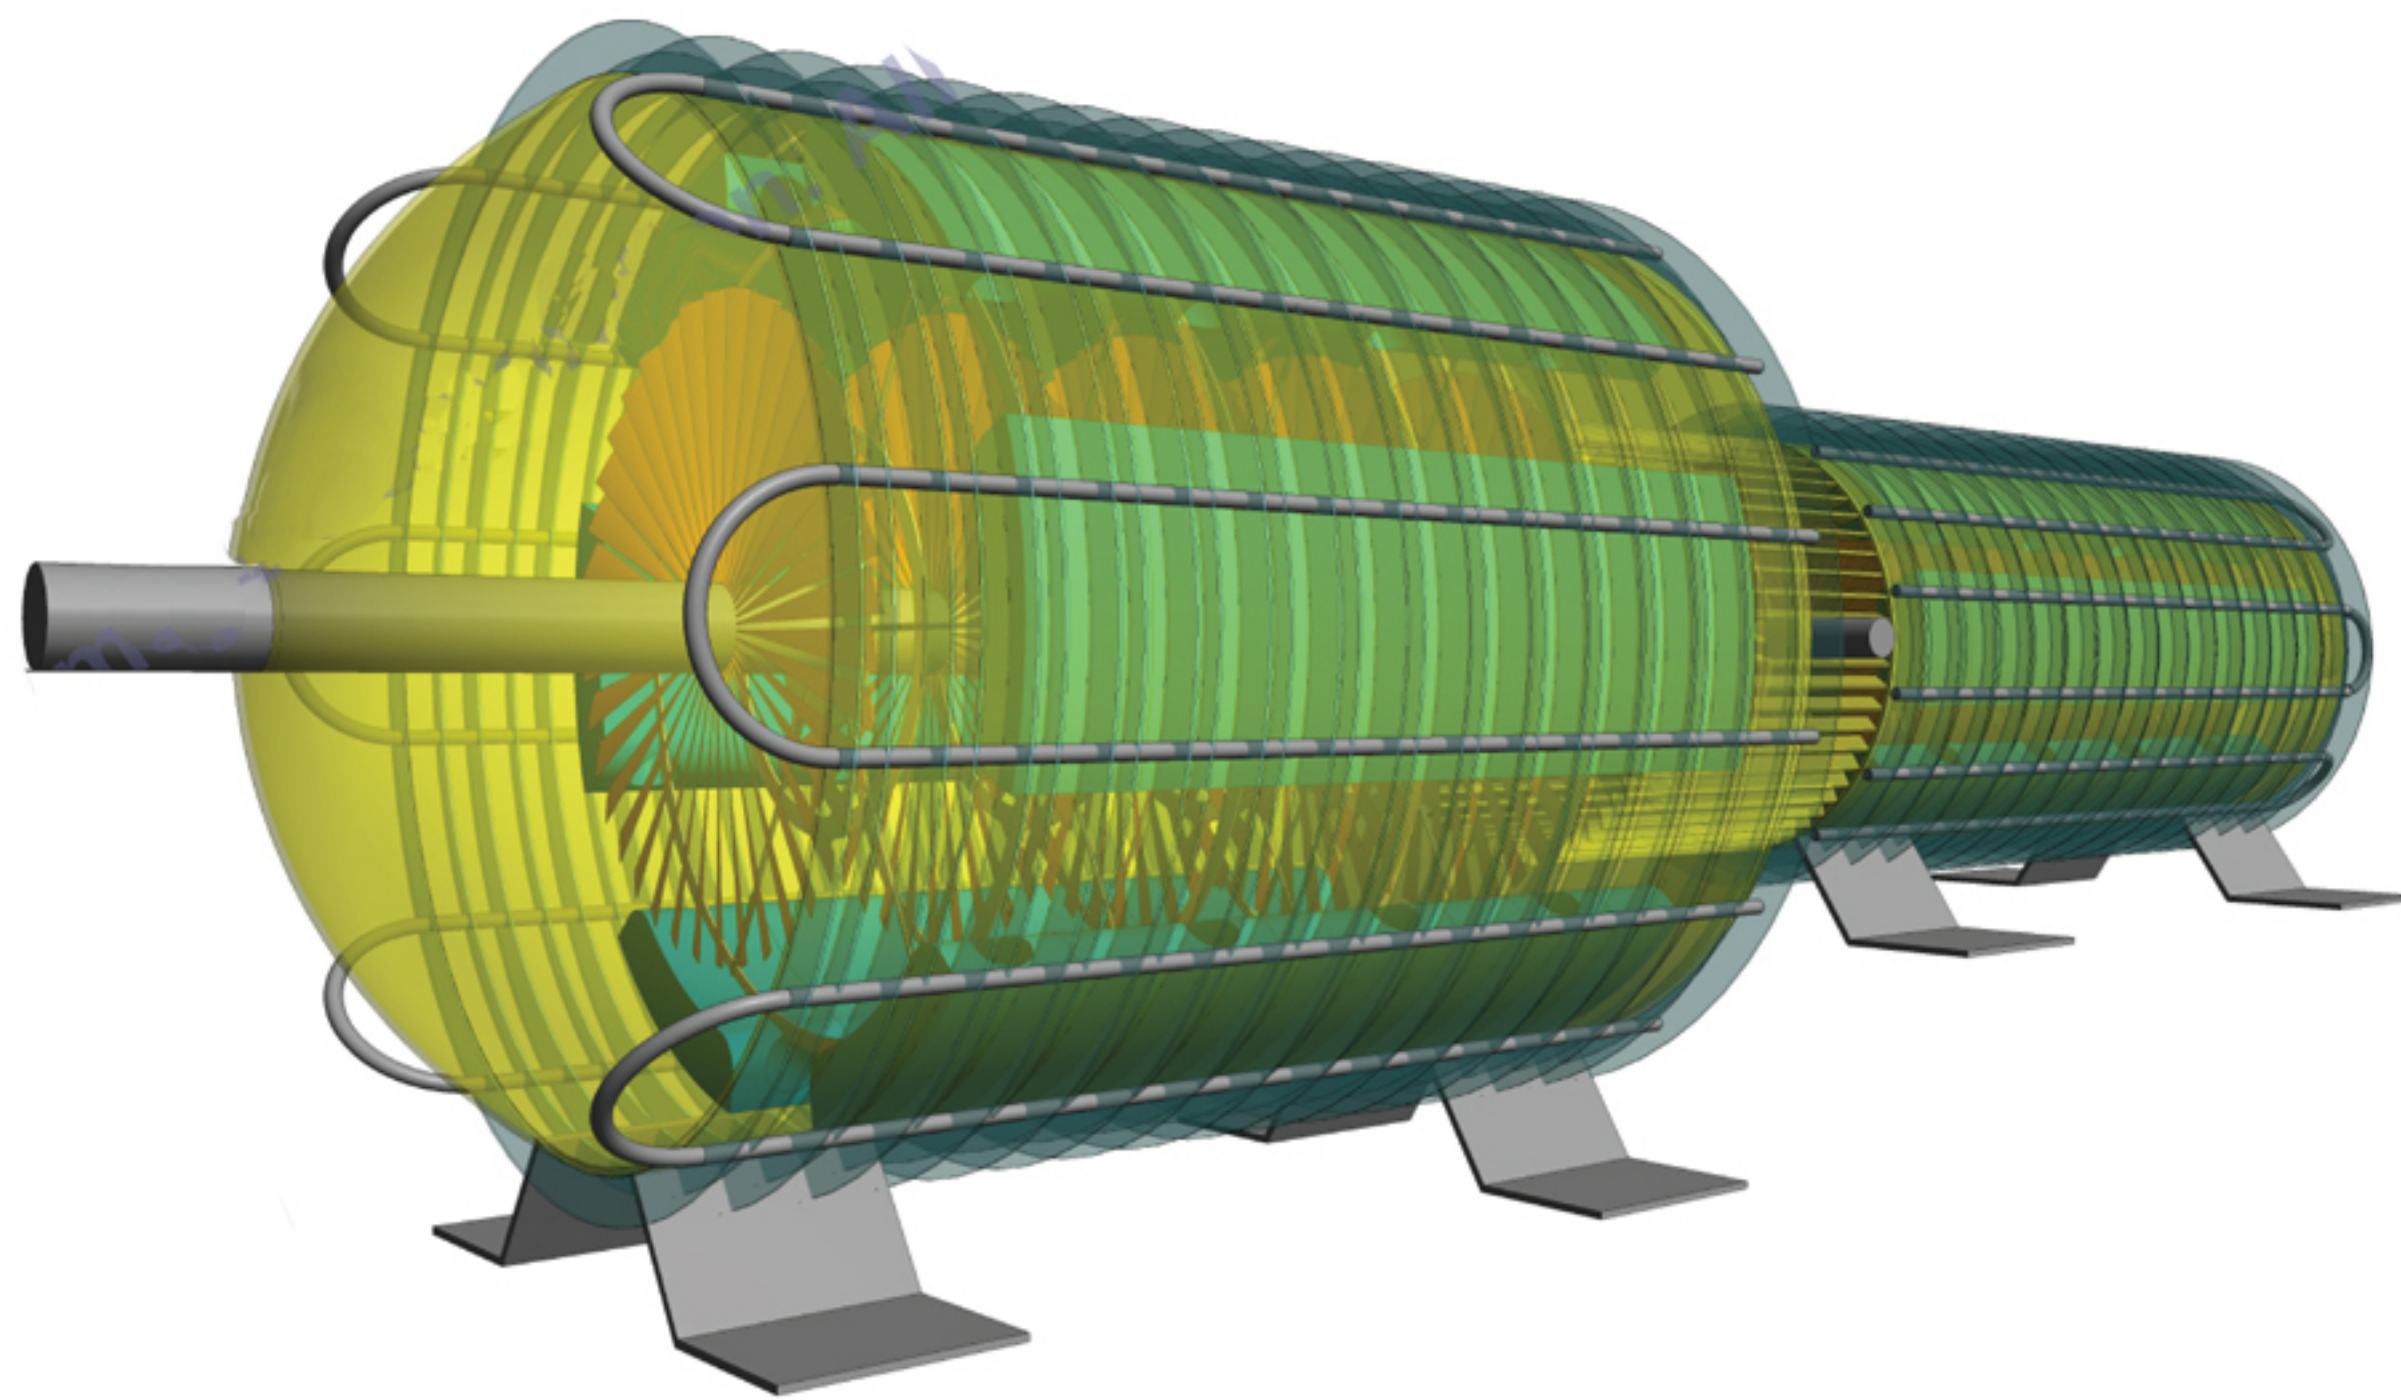

Designed strictly as a primary power source for industrial, commercial and residential applications, secondarily can be used as back-up generator in power outages. Qualifies for utility energy rebates by providing the end user with zero utility energy cost.

CRAM Micro Grid line boosters, a mechanical energy producing device operating continuously 365/24, is internally self-propelled up to 35% of the rated output, not fossil fuel, wind or solar powered. After exceeding the 35% self-propelled threshold, using minimal onsite electrical power, produces double the electrical power it consumes by multiplier technology recirculating excess power back to the grid or battery power back-up storage.

US patent pending 16/428,988 62/679,754

Made in the USA.

AGT Micro Grid Generators are superior to any others on the market, period.

- ✓ Produces both AC/DC Power
- ✓ 50Kw - 1000Kw Units
- ✓ Drive system fluid cooled
- ✓ Onboard shutdowns
- ✓ Performance Analyser
- ✓ Air conditioned & Insulated Enclosures
- ✓ Low noise decible
- ✓ Fast assembly & delivery
- ✓ Made in the USA
- ✓ 100% Duty Cycle Energy Production
