

Clean Energy Curriculum for Maine Educators

Our Project will:

- Share **resources** and **materials** with educators
- Provide teachers with **hands-on** and **project-based** STEAM curriculum that **empowers** them to engage their students in learning about **sustainable energy**
- Help teachers to provide sustainability education to **underserved** communities in Maine

College of the Atlantic

2023 COA Pilot Program Testimonials:

- “I loved the field trips at COA and the expertise and experience of our host and professor David Gibson!”
- “I liked that we went through the actual activities ourselves. It was really fun and it gave us a chance to see what our students would create or where they would get confused.”
