

GismoPower® MEGA®

Paragon Cooperative is a non-profit organization for BIPOC LGBTQP+ Lifestylers for improved literacy, informed consent, knowledge and sustainability. Our goal is to create a safe live-work-play retreat where rehabilitation and education help the community. Paragon Cooperative will deploy America's first Portable, Powerful Plug In "Mobile Electricity Generating Appliance" or MEGA, designed to enable renters and Low Income Consumers to become Prosumers and take their electricity generation into their own hands.

Mobile Electricity Generating Appliance

Paragon Cooperative qualifies as disadvantaged, according to the Climate and Economic Justice Screening Tool put forth by J40. Their lands have suffered from pollution and destructive development projects. Because of their low economic status, they have not had the opportunity to access renewable energy opportunities, though it is embedded in their traditional values to live harmoniously with the environment.

The MEGA®, is a portable, powerful carport appliance which generates & feeds electricity to the grid by means of a 240V plug & outlet.
