

# Community Clean Energy Workforce Upskill Pipeline Pilot Program Mission

The USGBC-LA Community Clean Energy Workforce Upskill Pipeline Pilot Program (CCEWUPP) will establish a local infrastructure for clean energy training, support, placement, tracking, and retention of a diverse workforce from disadvantaged communities, achieving the goals of the Justice40 Initiative. The program will offer entry points for workers with varying experience levels, from entry-level to management-level professionals. This project will meet the increasing demand for a building decarbonization workforce in Los Angeles, creating a workforce ready for clean energy careers.
