

Social Impact Bonds for All

Community Energy Innovation Prize

RCF Connects will work with local municipal officials and community organizations in North Richmond and Vallejo, CA to build wealth among low-income communities of color while lowering greenhouse gas emissions. It will accomplish this by passing a Social Impact Bond ordinance, purchasing abandoned properties, hiring local developers of color trained by Richmond Neighborhood Housing Services to renovate the homes with clean technology using MCE's incentives, and selling the properties to first-time homeowners.
