

Community Energy Innovation Prize – AMERICAN MADE -

TEAM SOLARFUND.AI

Like Tesla and automobiles, water heaters are in for an upgrade now. Electric water heaters use 30% less energy to do the same function.

We will develop a plan that will have full transparency from start to finish that will give every member of a house in El Cajon the ability to follow the program. There will be (not set up yet), a feeder into Hologram.University that will enable Education Rewards to accumulate like miles towards a degree at Hologram.University. We can fill as many positions as we possibly can per project.

Every city block across El Cajon will be transformed into a virtual Island. Each block will be fitted with two Baker Electric car ports with 200 panels each. The cost for these (see blueprints) will be \$2,000,000 before the 30% government rebate. NEM 3.0 is shaking things up and we will submit our final plans for the entire city to lock in our solar rebates prior to the April 2023 deadline.

We will work with Hologram.University to develop courses that are associated with rewards and ideas to build excitement and involvement.

After we complete installing, upgrading, planning and educating the household about why it is important to install a system that draws 30% less energy, we have them complete an education course about the process of installing and methodology.

Every aspect of this will be documented and tracked. Reports will be a key factor in the education process that is rewarded with everything from rebates, free food, coupons or HOLOGRAM.UNIVERSITY credits.

Headquarters:

14248 Caminito Lazanja, SD CA 92127 – 310-4304488

OUR GOAL is to use the prize to pay down our first installation of the 2 Car Ports situated on the block of 131 E. Main Street, El Cajon CA 92020.

We will raise the funds to purchase, own and operate all solar panels across all DAC Zones. This will generate significant revenue for education programs and will be the blackhole for involvement. There are so many ways we can go with this.

We will utilize our powers to reach every single person in El Cajon. This will be tracked on our PRIZE TRACK UPDATE.
