

# SOURCE COALITION: REVOLUTIONIZING ACCESS TO ENERGY SERVICES

## Community Capacity Building

- Conduct comprehensive community needs assessments
- Organize tailored capacity-building workshops and training sessions
- Engage local leaders and stakeholders

## A Simple Plan For Project Success

- Retrofit Analytics Tool: Actionable insights to improve energy performance without requiring site visits
- Integrated System Packages: Standardized engineering specifications

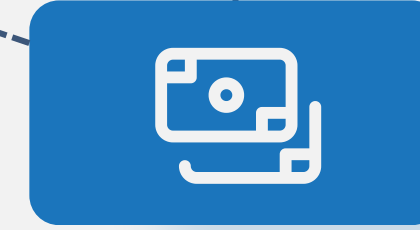

**Problem: Underserved San Francisco Bay Area communities face high upfront costs, inconsistent contractor quality, and low community awareness**

**Solution: Unlock Energy as a Service in underserved businesses and low-income households by expanding community awareness, reducing project design costs, and creating simplicity and trust in project development.**

## Energy as a Service Delivery Model

- Hassle-free project development
- Guaranteed results
- Zero capital outlay and immediate cost savings
- Performance risk mitigation

## Measured Community Outcomes

- Expanded access to quality energy services
- Improved heat resilience
- Reduced energy burden
- Improved indoor air quality
- Job creation
