

## Renewable Energy Equity Fund (R.E.E.F.)

Our shared work that aims to:

- demonstrate a clean energy ecosystem led by entities that have been historically underrepresented to drive local building research, development, demonstration and deployment of innovative clean energy solutions and innovations in the Metro Atlanta region and broader Southeast region of the US, and
- provide a scalable approach for electrification retrofits and energy efficiency upgrades that integrates a “hyper-local horizontal scale” with a “vertical scale” allowing for adaptation across other marginalized communities in Georgia, the Southeast, and nationally.
