What we've built

- Automated curriculum across: Ideate, Build, Launch
- “Mechanical Mentor” AI assist for innovators
- Mentors also get help from AI to give advice to innovators

Implementation

We partner with the top accelerators, and offer the climate innovators who didn't make it in a chance to prove their metal in our scalable platform and synchronous programming.

Project

Once awarded we will increase access for underserved climate change founders and the number of innovative solutions needed in order to create more sustainable energy solutions for our future.
