

EPIC Round 3

Austin Technology Incubator

- Located in the middle of 5 states that have a lot of rural area to serve
- Leveraging a highly refined process for building and maturing startups, a key component of any healthy innovation ecosystem
- Working with National Science Foundation's Innovation Corps (I-Corps) program™ Southwest Region Hub, we will help engage energy tech start-ups in the regions where our partner universities exist and support them as they move towards identifying market opportunities. The Hub provides the exposure and connections to expand the Sustainability portfolio, which includes verticals in Energy, Water, Mobility & Transportation, Food & AgTech, Circular Economy, to underserved rural and disadvantaged regions.
- ATI aims to assist and benefit the building out and maturing of the ecosystems, with a significant focus on the universities in the more rural currently underserved areas.
