

KEI

.....Where Energy Incubation is Boundless

Summary

The vision of KEI is to be an ecosystem where energy innovation thrives in Kern County. KEI will attract startups and facilitate mentorship, technology validation, business development, connections with manufacturers, and other resources that are critical to a startup's success. In addition, it will create the launch space and required facilities for these startups to test and prove their technologies and commercial viability. Furthermore, KEI will ultimately provide startups with capital to launch, grow, and scale their innovations.
