

Dream.Org, in partnership with Village Capital is proposing a project to create a **launchpad program for BIPOC entrepreneurs and BIPOC founded start-ups in the clean tech and green infrastructure space**. The program will be centered in the greater Pittsburgh, PA region, and focus on **building BIPOC talent that will work in Justice40 communities to help combat environmental injustice**.

Our first launchpad will be held in 2024 with subsequent cycles operating in 2025, 2026, and 2027 - **reaching 40 BIPOC founded climate businesses**.

At the end of our program, participants will be **investor-ready and become members of the Dream Entrepreneurs Network (DEN)** which is a network specifically for BIPOC innovators to **receive mentorship and ongoing support and resources to scale their solutions and improve their communities**.
