

Repurposing Large Engines to Reservoir De-silting

Inventor Baha Abulnaga

Hundreds of navy ships will be decommissioned in the next decade

there are 13 million registered trucks in America and half a million are sold every year

We completed lab tests and received an innovation award from USACE, USBR and NASA

Old engines are converted to solar steam engines for dredging

Our Invention Slurry Piston Engine Manufactured out of Repurposed Engines

We want to repurpose obsolete truck, powerplant and navy engines to sediment removal from 92,000 reservoirs through our slurry piston engine called slurry pulsejet invention and re-establish water storage and native rights
