

Llink Technologies Headlamp Remanufacturing Program

A headlight is
damaged in
avehicle
collision

The damaged
headlight is
diverted from
the landfill
through the
automotive
OEM core
collection
program

Saving 322 tons of
damaged
headlights and
over 68,575 cu. ft.
of packaging from
landfills for every
100,000 headlights
remanufactured

The remanufactured headlight
is available at 40% less than a
new one, and can be
remanufactured perpentually
by Llink Technologies

Llink Technologies
harvests the reusable
components,
extending their useful
life

Remanufactured
Headlight

Damaged Headlight

The
remanufactured
headlight is
tested to OEM
and Federal
standards, which
allows it to be
warrantied and
certified by the
OEM

Llink Technologies
assembles the
reusable
components into a
new headlight
assembly
