

Re-X Before Recycling Prize

Post-Fab Panels: An Upgrade to Deconstruction - Submission Summary

The Problem

- Buildings demolished annually = approx. 350,000
- Amount of Demolition debris generated = 550,000,000 tons in 2018
- Amount of C+D debris sent to landfills = 145,000,000 tons in 2018

The Solution

- Deconstruction - Disassembling buildings to reuse their components
- **Post-Fab Panels** - Our industry-changing method of keeping large panels (ex., walls) intact to reuse
- Amount of C+D debris diverted from landfills by ReUse Consulting alone = **100,000,000 lbs.**
