

ReCharge To ReUse Summary Slide

- At ReCharge Recycling, our mission is to support innovative, sustainable, cost-effective battery processing solutions that transform batteries to their next best use
- We safely test EV batteries after they can no longer be used in a vehicle
- We harness the remaining battery life by repurposing before recycling to give them a second life in a battery energy storage systems (BESS)
- ReCharge ReCycling has built a lab in Flint, Michigan, collocated with IBEW at their Joint Apprenticeship Training Center where we help provide meaningful engagement and participation to the underserved communities and underrepresented groups in Flint
- Join ReCharge ReCycling in creating a sustainable, green world—let's give EV batteries a second chance prior to recycling
