

Repeatable Resilience Hubs in Southland, IL

Community Power Partners

- **Coalition Leadership:** Driven by Community Power Partners, a coalition with a strong presence in underserved Southland Townships, combining local non-profit experience with GridBoost’s technological innovation.
- **Novel Approach to Resilience:** Establishing repeatable resilience hubs in Cook County, Illinois, using a data-driven, community-level strategy for site identification.
- **Community & Technical Synergy:** Integrating community feedback with technical site requirements to identify locations that address pollution, weather extremes, and energy insecurity.
- **Engagement Through Technology:** Leveraging GridBoost’s platform for a dual approach—engaging interested townships and municipalities and pinpointing potential sites through data analytics.
- **Proactive Solutions & Alignment with DOE:** Proposing resilience hubs that contain renewable energy generation and storage, with the technical solutions aligning with the DOE’s focus on sustainable and equitable energy transitions.
- **Commitment to JEDI Principles:** Demonstrating a diverse leadership team and a history of promoting justice, equity, diversity, and inclusion within community engagements and energy solutions.

Keywords: Southland Communities, resilience hubs, community level energy project planning, energy justice, JEDI.
