

Resilient Palisades' Pali Microgrid Project was Los Angeles' first successful group purchasing program for rooftop solar and battery storage with long-term plans for grid self-reliance during peak energy periods.

Leveraged volume to get the following from installers:

- Lowest possible prices
- Best equipment
- Service guarantees
- Customer protections

Via:

- Comprehensive RFP process with installers
- Multi-channel marketing outreach to community
- Reproducible methods that can be applied in other communities

**Resilient Palisades is seeking the Solve It Prize to adapt our group purchasing program to serve marginalized communities in LADWP service area who would like to increase their renewable energy resources and energy resilience**
