

# SiDSys by Element 29: Pioneering Clean Water and Energy Solutions

## Introduction

Team Name & Lead: **ELEMENT 29** | Bill Cassidy | Lutz, Florida

Mission: Addressing the pressing needs of underserved communities through innovative water distribution and clean energy solutions.

## The Challenge

- Severe depletion of US aquifers, especially in disadvantaged, underserved communities.
- Need for sustainable, equitable access to clean water and energy.

## Our Solution: SiDSys

- Technology: Stand-Alone Independent Distribution System (SiDSys), powered by solar energy, enhancing water accessibility while providing electrical grid resilience.
- Impact: Decreases energy burden, improves environmental health, and boosts clean energy access in disadvantaged communities (DACs).

## Strategic Partnerships

- Collaborating with Mustard Seed Communities, LG Water Solutions, and AquaClara Reach for tailored, scalable solutions.

## DOE's Policy Priorities Alignment

- Directly advances all eight DOE's policy priorities for Justice40 Initiative implementation, from decreasing energy burden to increasing energy democracy in DACs.

## Engagement Plan

- Phase II (Engage): Partnering with communities and local organizations to align SiDSys with community needs through workshops, training, and pilot deployments.
