

Creating a Community Oasis

Team Oasis – Nikita Reed, P.E.

My mission is to educate and empower communities regarding environmental issues so that they can become effective self-advocates.

- The team has identified four Justice40 communities in Northwest Duval County Florida for focus. These are low income communities with high average annual energy costs, high housing costs, and high rates of adverse health outcomes.
- The challenge that this team will be addressing is vulnerability due to power outages and extreme heat. A Community Oasis seeks to address these problems in ways that are tailored to each community.
- A Community Oasis will provide solar power charging, energy during power outages and temperature refuge islands for the neighborhood.

Partnering with Dinahsty's Consulting Services, LLC – Pioneering innovative solutions to advance businesses and communities. Strategic planning, economic growth, and community revitalization.
