

Just Post Carbon Communities of Practice

Irresistible Community Builders, LLC

- At Irresistible Community Builders, we cultivate tight-knit communities where residents are acquainted with all of their neighbors, cultivate the majority of their food, harness renewable energy sources, and advocate for worker-owned microenterprises.
- The energy-related challenges we seek to tackle encompass the following
 - inadequate access to cost-effective solar energy
 - inequitable 'net metering' policies
 - limited availability of fresh, nutritious food
 - insufficient training opportunities for lucrative careers that could pave the way for cooperative business ownership.
