

# Transforming Brownfields into Solar Powerhouses

## Team Sunlight on Shadows

- **Huy Nguyen:** Specializes in enhancing grid resilience and community clean energy grant projects, with a strong focus on social equity; experienced in executing grant projects and collaborating with local community leaders.
- **Eden Elan:** Possesses extensive experience in the solar industry, focusing on community engagement and leading solar project implementations; skilled in securing funding through investor relations.
- **Felicia Chen:** Expert in computer science and AI, adept at managing government contracts; CEO of GrantScout, which simplifies the grant acquisition process for small organizations.
- **Anesu Mafuvadze:** Offers a decade of experience in software development and education; excels at creating online platforms that link communities with clean energy resources.

Team Sunlight on Shadows are set to implement a transformative solar program on brownfield lands benefiting the communities of Colony Park, Twin Creek Meadows, Pecan Park, and Haris Ridge on the outskirts of Greater Austin, Texas. Leveraging Huy's utility sector expertise, Eden Elan's experience in community solar projects, Felicia Chen's skills in grant acquisition, and Anesu Mafuvadze's software development capabilities, the team aims to enhance energy resilience and reduce utility costs for these disadvantaged areas.
