

Ensuring Sharpsburg's Clean Energy Future

Duquesne Light Company (DLC)

Anna Connor – Innovation Center

Angela Feldbauer – Environmental, Sustainability, and Governance (ESG)

Robert Lincoln – Transportation Electrification

Clint Noack – New Products & Services

The Community and Its Challenges

- Sharpsburg, PA – Population of approximately 3,000, 25% below federal poverty line.
- A community that has suffered loss of former steel and glass industries.
- A community with a vision for (clean) energy independence.
- Currently a high energy-burden community with old, inefficient building stock.
- Health and quality of life impacts due to industry/commerce in surrounding areas.
- Existing electrical distribution infrastructure has limited capacity and operational constraints which may challenge attainment of an independent clean energy future.

DLC's Partners

- Borough of Sharpsburg, Mayor's Office
