

Electrify the Block

- Dream.Org is a national 501(c)3 that works to ensure that historic climate funding benefits communities that need it most.
- Dream.Org is partnering with Integrated Solutions, a certified Black woman-owned energy services company, and Tallahassee Food Network, a regional coalition of the global movement working to grow community-based good food systems, to address energy burden in the Frenchtown and Griffin Heights communities in Tallahassee, Florida.
 - These communities face a 10% energy burden and are designated as Justice40
- We are proposing the following potential solutions to address energy challenges:
 - Performing energy audits
 - Installing rooftop solar and battery storage
 - Creating a clean transportation plan
 - Developing a community agriculture plan
