Harvard Chan School of Public Health

MyDzung, PhD, MSPH
Assistant Professor
Tufts Medical Center

George Huynh
Executive Director
VietAID

WHY

The typical resident in Dorchester spends over 10% of their income on energy, and are disproportionately affected by health outcomes tied to poor housing conditions

HOW

Our team empowers low-income homeowners in Dorchester, Massachusetts, to lower their **energy bills**, cut their **carbon emissions** and improve their **health** at home by providing home performance testing and targeted home improvement at no cost
