

CORE

Community Office for Resource Efficiency

OUR PURPOSE

We believe an independent leader and regional partner is critical to urgently reduce our region's contribution to climate change through the strategic deployment of innovative and responsive technical assistance and climate action.

OUR MISSION

Leading the Roaring Fork Valley to a carbon-free, net zero energy future.

OUR DRIVE

To serve as a resource hub for the Roaring Fork Valley, a growing rural mountain region in Colorado, by bringing more partners and resources to the table. CORE's special project, *Reaching CORE's Community Priority Participants*, provides to its underserved constituents the resources necessary to transform their homes to energy efficient systems.
