

Project Revive Terra Firma

Team Name: Project Terra Firma

Team Members are as follows: Blake Fisher is the data analyst and planner, Christopher Storr is the design specialist and William Jolley is the team's public engagement specialist.

Project Revive Terra Firma (PRTF) is a resiliency initiative that will engage the historically underserved Brooklyn community of Baltimore City, MD. Support during the Embark phase will help lay the foundation for a renewable energy project by enabling the facilitation of meaningful engagement determine how the community feels the project will enhance their quality of life.

The project aligns with two DOE interest areas by providing solutions for grid modernization and energy storage as a secondary area. Grid modernization in historically underserved communities will be achieved by localizing the actions to adapt with climate change. Energy resilience is a core aspect of this demonstration project because a community will have an asset to life sustaining actions.
