 Product development and automotive
 (Visteon) experience (19 years)

Dr. Paul Rasmussen – Co-founder
 Materials processing 120+
 patents and papers

Prof. Levi T. Thompson
 M&A and IPO (T/J Technologies & A123) 30
 years materials development

Dr. Stefan Heinemann – Co-founder
 3 successful start-ups Focus
 on commercialization

Meera Vijan – UM Residence Mentor
 President Ovonics, Plant Manager
 A123 Systems (30 Years)

SUMMARY

Challenge: Higher costs, time, range, performance and safety limit energy storage efficiencies in the clean energy power utility systems, grids and electric vehicle and transportation markets.

Solutions: Our collaboration with the University of Michigan create solutions through supercapacitors and Hybrid Energy Storage Systems (HESS).

- Industry experts with proven track record of successful startup, M&A, & IPO
- +70 patents, +150 years experience total
