

Just Energy Transition Solvers (JETS) Empowering Resilience

The Team: NE STEAM Coalition (NESC) a seasoned community convener around STEAM topics and NOSO Environmental LLC, a minority owned technical climate solution firm.

NESC will coordinate programs and interface with community, NOSO will assist with coordination of technical partners and provide technical support to the coalition.

The Approach:

Education and Experiences: Create opportunities for NESC community to experience weatherization and energy efficiency products and techniques

Ideation and Innovation:

Work with industry to define community needs and develop new energy solutions to benefit all.

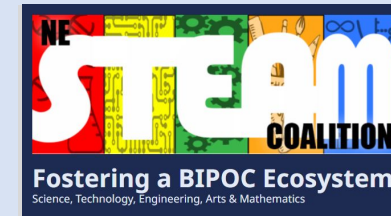

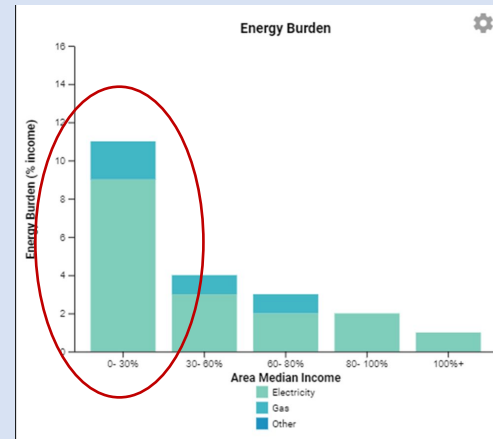

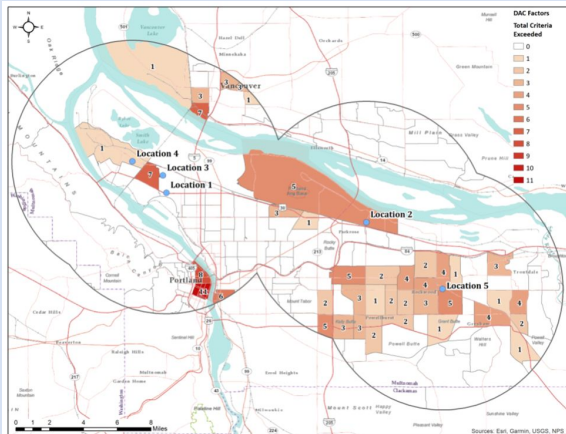

Connection and Collaboration: Work as a community to improve building efficiency for community centers, learn skills, work with industry partners and identify opportunities.

Partners:

The Community:

Our focus are people who live throughout N and NE Portland who have been impacted by legacy economic and planning policies that have resulted in high energy burden.

We focus on people who are dealing with energy burden regardless of their household location when defining our community.
