

Green Home Application Assistance and Green Community Collective Bargaining

1. Application Assistance for a diverse range of public/private programs and grants available at the federal, state, and local levels.

2. Green Community Collective Bargaining Whether through initial data collection or subsequently scheduled energy audits, our ultimate goal is to create a comprehensive schedule of home health and efficiency needs for subscribed participants in the area to facilitate project cost reductions associated with administering activities.

3. Tiered Home Energy Incentives and Community Storage Solutions Through our program's advocacy and promotion components, we hope to tie the benefits of these efforts into additional community campaigns that facilitate state and federal energy generation and storage targets.

Presented by Synia Gant-Jordan and Aaron Newman.
