

DAYTON'S PATH TO DECARBONIZING HOMES

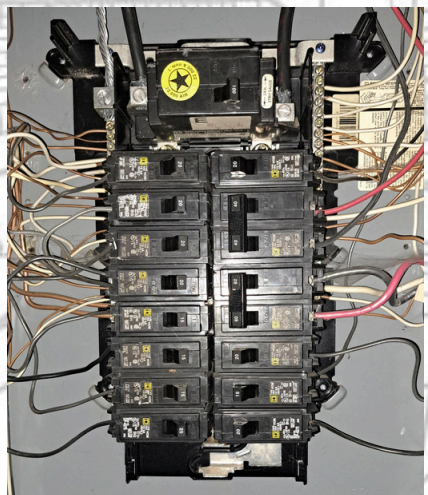

1

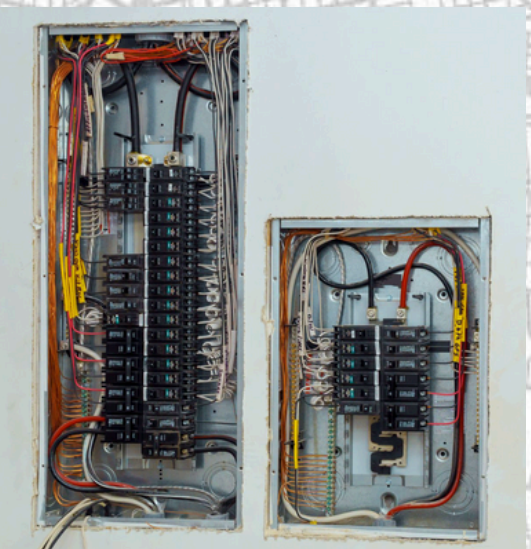

2

3

4

5

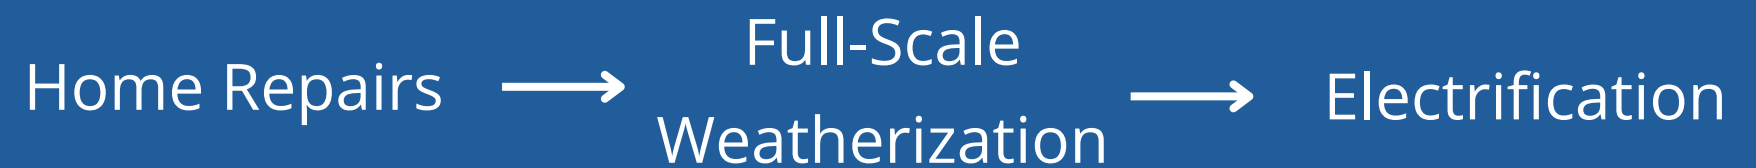

The Need:

Disadvantaged Communities with Aging Housing Stock

- > 30,000 Dayton households have an avg. energy burden of 12.7% (10% qualifies as severe)
- 44% of households are housing cost-burdened
- 1,370 households on waitlists for home repairs
- Majority houses have gas heating

The Proposed Solution:

Collaborative Comprehensive Home Retrofit Program

The Team:

The Dayton Home Repair Network

a Collaborative group of organizations, led by the Dayton Energy Collaborative, that perform home repairs and weatherization measures for low to moderate-income households in the Dayton area.
