

CARBON DESTROYERS

Project Title

OUR MISSION

According to the U.S. Department of Energy, commercial buildings are responsible for 826 million metric tons of carbon dioxide emissions (CO₂e) per year, which is 16% of the country's total emissions. Maine Glass has been effectively reducing carbon dioxide emissions as an SGS industry leader since 1995. In partnership with the US Department of Energy, Maine Glass intends to eliminate 300 million metric tons of CO₂e from the planet. We are perfectly suited to take on the task of helping the United States achieve a net-zero-carbon economy by 2050.

MAINEGLASS

WINDOW & ENERGY SOLUTIONS

Team Name, U.S. Manufacturer of Interior Secondary Glazing System for over 30 years

Park Ridge IL, 60068-4677
