

Our mission is to sustainably improve the energy efficiency of as many underperforming windows as possible.

Our *WexWindow* products have already demonstrated market acceptance in Justice40 tracts for nearly all window types. *WexWindows* deliver glazing insulation and solar heat gain reduction. They are differentiated by their easy snap-on installation, and an ultra-lightweight, low embodied carbon design, using materials that fit into circular economies today.

We're bringing new clean energy jobs to disadvantaged communities because *WexWindows* are manufactured in a Justice40 tract and 100% MADE IN THE USA..

Now we're taking everything we've learned about delivering affordable, easy to install window retrofits to the next level.

With high-performance glazing and frame insulation options, we will reach today's stringent criteria for new Energy Star® 7.0 windows.

SIMPLE PAYBACKS UNDER 4 YEARS

for **Window Retrofits**
