

Nu-Fen Commercial Retrofit Window System

an improved secondary window interior glass attachment solution for inefficient, low performing windows in existing commercial buildings

About Nu-Fen

- Eliminates need for full window replacement or reglazing
- Attaches to any existing commercial window
- Mitigates air infiltration, energy loss, and unwanted solar gain
- Provides thermal and acoustic benefits to building occupants
- Offers added technology upgrade options
- Integrates with Building Management System

Nu-Fen's Leadership

Nu-Fen's co-founders Steven Sherman and Cindy Brown combine nearly a century of experience and expertise in the commercial building envelope sector with entrepreneurship, business development, and commercialization of new technologies. Nu-Fen leadership is exceptionally equipped to successfully shepherd Nu-Fen and its cutting-edge technology through market adoption.

Together with its partners 3M, Sharp Glass, and Ancillary Design Services, Nu-Fen is well positioned to excel.

Nu-Fen's Benefits

- Affordable pricing
- Easy-to-install
- Minimally disruptive to occupants
- Convenient accessibility for maintenance
- Enhances window performance
- Provides greater thermal comfort
- Advances building resilience
- Increases envelope insulation values
- Dramatically improves energy savings
