

Buckstop: using AI innovation to drive e-scrap recycling

Our core offerings:

- ◆ **Device Assessments:** leveraging AI to conduct raw material assessments and document maintenance, compliance, emissions reduction and to create actionable decommissioning forecasts.
- ◆ **Reverse Logistics:** using our device assessments to instruct a network of technicians to carry out decommissioning and end-of-life processing on behalf of OEMs and asset owners.
- ◆ **Decommissioning & Analytics:** building tailor end-of-life plans for fleets of deployed electronic devices. Our plans cover decommissioning, removal, refurbishment, ITAD, and recycling.

Responsible Processing and Critical Mineral Recovery
