

# Clean Energy is Vulnerable

## Hackers

Cyber attacks can take down home energy systems, or worse, the whole utility grid

## Monitoring

Inconsistent and unreliable monitoring systems leave you wondering

## Maintenance

Most home battery systems are not being maintained properly, leading to shorter lifespan

## Firewall

Block all unauthorized network traffic from reaching your home energy storage and solar electric systems

## Third party monitoring

See all of your renewable energy system in one app. Get high quality reliable data with cloud connected, independent shunt based monitoring

## Maintenance Reminder

Get alerts on how to best take care of your battery based renewable energy system for optimal yield

Groundbreaking hardware-software that acts as a vigilant guardian for home renewable energy systems

Protocol-D
