The Community Solar Intelligence Hub (CSIH)

The complex and fragmented regulatory landscape for community solar creates significant barriers for developers, particularly smaller organizations, slowing the deployment of clean energy in underserved communities.

Real-Time Regulatory Tracking	Capital Access Navigator	Customer Acquisition & Subscriber Management	AI-Powered Contract & Compliance Management	Data Democratization for Small Developers
Integrate dynamic, real-time updates on regulatory policies from NREL, state PUCs, and other agencies to keep developers informed of the latest changes in community solar regulations.	Connect developers with funding opportunities and ensure compliance with Justice40 initiatives, aiding in securing project financing for community solar projects.	Provide tools to streamline customer acquisition and subscriber management for low-to-moderate income (LMI) households, making it easier for developers to reach underserved communities.	Utilize automated compliance monitoring and contract management features, such as ContractPower's ClauseSense and PowerReg, to simplify regulatory and legal requirements for community solar developers.	Offer affordable access to vital tools and resources, previously only available to large organizations, to ensure equitable access for small and underserved community solar developers.

CONTRACT POWER
