

SUMMARY SLIDE: AirMiners Phase 2 Energy+CDR Program

- The accelerator **creates new programming**, for Energy and Carbon Dioxide Removal (CDR), supporting startup creation, build regional partnerships, and provide DEIA and sector specific support
- **Energy+CDR** helps others understand the transition process for carbon removal from an idea to a marketable product while ensuring that equity, justice, and meaningful community engagement are at the forefront of emerging and established technologies
- **Partners** include DAC Hub participants Net Zero Center of Excellence at the University of Illinois, and AirCapture, as well as environmental justice leaders like Carbon180 and Indigenous Greenhouse Gas Removal Commission (IGGRC)
