

COMMUNITY SYSTEM SOLUTIONS PRESENTS:

EQUITABLE ENERGY FOR ALL

a business model & proprietary software

We address the **solar equity gap** through our **unique business model and software:**

making solar adoption accessible and inclusive.

Our **Equitable Power Purchase Agreement (EPPA)** is powered by union pension funds, lowering the ROI because it's **focused on job creation instead of high profits.**

We have initial clients and pilot projects ready to start.

By **prioritizing underserved communities**, we will generate over **\$60 million** in solar financing in the first two years.
