

# LATTICE ENERGY

a Rimation Solution

your energy **EXPERT**

[contact@rimation.com](mailto:contact@rimation.com)

## CHALLENGES TODAY

### Challenge 1

Current residential solutions cater to homeowners in upper income communities and fail to address renters and low-moderate income households.

### Challenge 2

Current DER installations involve time consuming processes, i.e. engineering, permitting, installation, inspection (PII) – with a sale-to-operational time of 3-6 months.

### Challenge 3

Traditional PV-only systems cannot produce backup power during grid outages.

## TEAM

# RIMATION

Custom Solutions Engineering
