

# Objectives

## Objective 01

Create pathways to solar jobs for minority youth and women of color, providing education and training for careers in renewable energy.

## Objective 02

Tackle the systemic barriers that prevent communities of color from accessing quality jobs in the clean energy sector, specifically in solar.

## Objective 03

Provide tailored education, hands-on training, and mentorship opportunities that equip participants with the skills necessary to enter the solar industry.

## Objective 04

Training curriculum emphasizes not only technical skills in solar energy installation and maintenance but also soft skills like leadership, communication, and financial literacy.
