

Revolutionizing Solar Operations for a Brighter Future

- ▶ The solar industry has long been held back by inefficiencies, fragmented workflows, and unreliable data collection. But what if there was a better way?
- ▶ Imagine going from site survey to permit-ready plan sets as soon as point of sale.
- ▶ Imagine capturing all the necessary data the first time, ensuring the success of permitting submissions.
- ▶ **Introducing the Skyfire Solar Design App**
 - ▶ **App Features**
 - Advanced Site Documentation tool with embedded training and education tailored for consistent site surveys for residential solar & storage systems
 - Instant automated permit-ready plan sets tailored to AHJ, Utility, Code, and Manufacturer requirements.
 - AI-powered features for identifying and calculating equipment specs throughout the system.
 - Accuracy and speed: what normally takes days, weeks, or months now takes minutes.
 - Built-in compliance checks, so errors and delays become a thing of the past.
- ▶ Vertically integrate and automate time consuming and error prone installation processes.
- ▶ Our app is revolutionizing solar installations, streamlining operations, boosting profits for installers, and delivering customer satisfaction like never before.
