

Fundusol

Your Partner in Agrivoltaics

Our Innovative Approach:

Fundusol Tackles the 3 Primary Challenges of Agrivoltaics:

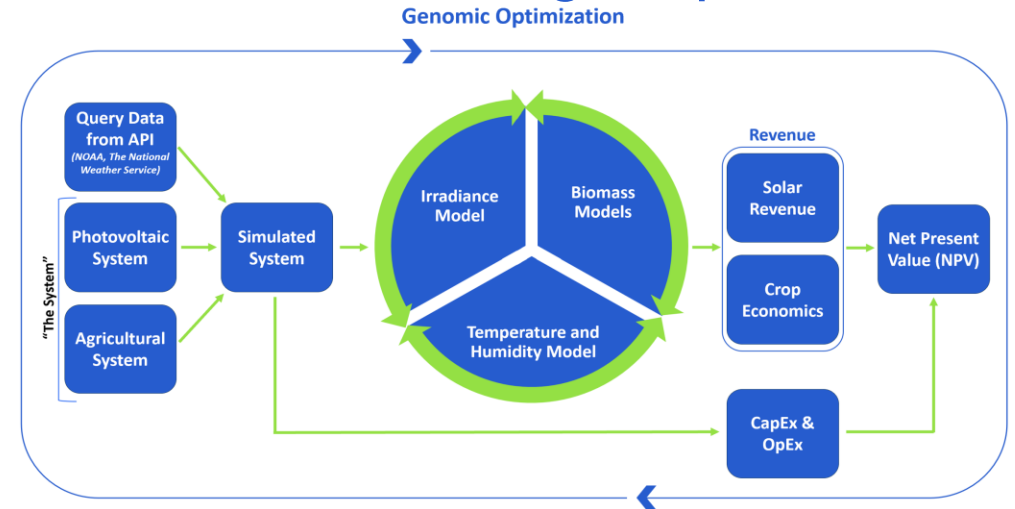

Using GIS to find optimal locations for agrivoltaics systems.

Our model is a one-stop-shop to predict performance.

Integration of local requirements into system design.

Advanced Modeling Capabilities:

Future Expansion:

Provide Permitting Assistance

Provide permit-ready system designs and assistance with every facet of the permitting process.

Goal 1

Improve Modeling Capabilities

Validate our models using real-world data to expand our modeling accuracy and capabilities.

Goal 2

Goal 3

Launch Agrisolar.Land

Create a marketplace for farmers/landowners and solar developers to auction projects and land.
