

Alaska Industry Decarbonization Through Innovation

Identify

Launch Alaska will work with partners in a specific industrial sector to identify a specific problem or market opportunity that an innovative startup could help solve.

Source

We will utilize our broad network of amplifiers and our portfolio companies to find and recruit the top energy startups to participate in the industry innovation challenge.

Implement

Using a staged model building on our experience with the Tech Deployment Track, we will connect rural Alaska partners with the technologies to solve the challenge.

Deploy

We'll assist the startups and project partners on deployment of the actual technology by removing any potential roadblocks and connecting projects to funding sources.

- Identify projects in rural Alaska communities
- Engage disadvantaged communities
- Foster long term innovation
- Deploy clean technologies
- Reduce emissions in the industrial sector
- Work with industrial partners to deploy new technologies

Launch Alaska is committed to embracing Diversity, Equity and Inclusion (DE&I) as core values that intentionally create space for favorable outcomes. We have implemented a DE&I Plan to build out our policies and procedures in ways that directly support diverse groups in our network, both internally and externally. Diversity in Launch Alaska's programs fosters enhanced innovation, brings unique perspectives, and positively influences our mission to accelerate Alaska's energy transition.
