

Building Bridges in the Climate Tech Ecosystem

Dream.Org is a national 501c3 nonprofit organization that closes prison doors and opens doors of opportunity into the green economy. Dream.Org's Green For All (GFA) program works for cleaner air and water, affordable energy, and economic opportunity for all.

Dream.Org's MVP is a climate launchpad that advances BIPOC founded clean energy start-ups in the Pittsburgh area to prepare them for investor readiness and ultimately to scale their climate solution to draw down funds from the historic IRA and GGRF legislation.

During Phase 2 we:

- Recruited and provided technical assistance to **10 Black and Latinx climate tech founders**. The cohort also includes 4 women and 3 foreign-born founders.
- **Deployed \$100,000 of catalytic capital** to the 10 startups in our cohort.
- Provided TA that supported our startups in **raising \$610,000 of investment capital and hiring 3 employees**
