

# Llink Technologies Headlamp Remanufacturing Program

A headlight is  
damaged in  
avehicle  
collision

The damaged  
headlight is  
diverted from  
the landfill  
through the  
automotive  
OEM core  
collection  
program

Saving 322 tons of  
damaged  
headlights and  
over 68,575 cu. ft.  
of packaging from  
landfills for every  
100,000 headlights  
remanufactured

The remanufactured headlight  
is available at 40% less than a  
new one, and can be  
remanufactured perpentually  
by Llink Technologies

LlinkTechnologies  
harvests the reusable  
components

Remanufactured  
Headlight

Llink Technologies  
reuses the  
components in a  
new headlight,  
which is  
considered  
remanufacturing  
and has significant  
positive  
environemental  
impacts

The  
remanufactured  
headlight is  
tested to OEM  
and Federal  
standards, which  
allows it to be  
warrantied and  
certified by the  
OEM

Damaged Headlight
