

# SAVING AIRBAG LIVES BY REWILDER

Produced in LA with fair wages, building an upcycling community. As CA's new textile laws take effect, upcycling will play a key role in LA's sustainable future.

Rewilder reverses materialism: Changing how people see trash by creating fashion from upcycled materials, inspiring a shift away from new to sustainable.

**REWILDER  
UPCYCLED  
PRODUCT**

Manufacture upcycled bags and covers for car components like tools, manuals, sun shades etc. that would otherwise be made from new materials.

**OEM CAR  
MANUFACTURERS**

We have rescued thousands of pounds of material from landfill, and diverted over 2 million pounds of CO2 from entering our atmosphere.

R&D and design focused on maximizing material use and functionality. We standardize the cleaning and cutting process for waste airbags for scalable, efficient production.

**REWILDER  
UPCYCLED  
DESIGN +  
MATERIAL REHAB**

We're replacing new nylon in bag production with millions of upcycled airbags.

**DISCARDED  
AIRBAG  
WASTE  
PARTNER**

We have secured access to a steady supply of US-based, non-deployed recalled airbags, amounting to millions of pounds of clean, reusable nylon.

Over 34 Million Vehicles Affected :: 10 Different Automakers

## Takata Airbags Massive Nationwide Recall

June 2015

Written by: Terry & Kelly, PLLC

Millions of vehicles across all automakers and brands have been recalled to replace the frontal airbags on the driver's side, passenger's side, or both.

### Largest Recall in U.S. History

Takata recently doubled the number of vehicles recalled in the United States, to nearly 34 million - making it the largest automotive recall in United States history.
