

Game, Set, Recycle

189 million tennis balls, enough to fill more than **21 Airliners top-to-bottom**, were imported into the US in 2022. The average ball is played for a mere 10 hours, but together they have a carbon footprint of more than 10,000 cars driving around the globe non-stop for a year.

RecycleBalls is on a mission is to reuse and recycle every tennis ball, pioneering a sustainable future in sports through a groundbreaking model of circularity that inspires global change.

IMPACT

14,850,355
tennis Balls
recycled to-date

10,000
currently collection
bins in 48 states

5,287,664
ounces of rubber
reclaimed in 2023
