

Submission Summary Slide

- In our 7-year history, we have successfully repurposed batteries, transforming liabilities into profitable assets. We are now applying this proven capability to Lithium-Ion technology.
- We have mastered the complexities and costs of sourcing, rigorous testing, and certifying second life batteries of various chemistries including Lead-Acid with a comprehensive 3-year warranty.
- We achieve over 100% Gross Margin, which supports our financial strategy for offsetting the costs associated with Lithium-Ion batteries.
- WE CAN DO THIS, because we have achieved it before with 9 MWh of Lead-Acid technologies and are set to replicate our success with Lithium-Ion!
